

Attorney's Docket No.: 10559-S38001/P12444
Intel Corporation

REMARKS

Reconsideration and allowance of the above-identified application are respectfully requested. Claim amendments are provided herein to obviate the current rejection.

Claims 1-30 have been rejected under 35 USC § 103(a) as allegedly being unpatentable over Zwern in view of Miller. These rejections are respectfully traversed.

Each of independent claims 1, 11, and 21 have been amended to clarify that the display is non-head mounted. As Zwern describes an arrangement in which a display is mounted onto the head of a user, positional changes relative to the head of a user to the display cannot be tracked. Moreover, the display mounted on the head cannot be interpreted as being equivalent to the non-head mounted display recited in the claims. Therefore, the skilled artisan would not have combined Zwern and Miller to result in the claimed subject matter.

Accordingly, claims 1-30 should be allowable.

It is believed that all of the pending claims have been addressed in this paper. However, failure to address a specific rejection, issue or comment, does not signify agreement with or concession of that rejection, issue or comment. In addition, because the arguments made above are not intended to be exhaustive, there may be reasons for patentability of any or all

pending claims (or other claims) that have not been expressed. Finally, nothing in this paper should be construed as an intent to concede any issue with regard to any claim, except as specifically stated in this paper, and the amendment of any claim does not necessarily signify concession of unpatentability of the claim prior to its amendment.

Applicant asks that all claims be allowed. Please apply any charges or credits to Deposit Account No. 06-1050.

Respectfully submitted,
